Professional Summary

Full-stack developer with close to two and a half years of experience building scalable, production-grade web applications using JavaScript, React, TypeScript, Node.js, Express.js, and Next.js. Strong background in UX collaboration. I have strong problem-solving skills and a passion for building high-quality, scalable applications.

Skills

Frontend Development

HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, React Native

DevOps & Development Practices

Agile (Scrum), Code Reviews, CI/CD, Docker, Git, DigitalOcean, VPS, AWS cloud.

Testing & Quality Assurance

Playwright, Automated Testing, Debugging, Test Driven Development(TDD)

Database and Data Handling

PostgreSQL, API Integration, Data Validation, Data Exchange, Backend Services

UX & Design collaboration

Responsive Design, Mobile-First Development, Component-Based Architecture, REST API Integration, Accessibility (WCAG)

Backend Development

NodeJS, Express.js

Professional Experience

Fullstack Developer, *VisioradAI*

02/2025 – 06/2026

Ghana, Accra

- Developed and maintained the application using React, Node.js, TypeScript, Express.js, and Next.js.
- Built REST APIs and helped the frontend to navigate third-party APIs such as the Google Maps APIs.
- Implemented UI features based on business and product requirements while improving overall user experience.
- Troubleshoot and resolved bugs in production and development environments, improving application stability and performance.
- Built reusable, maintainable UI components using modern frontend best practices.
- Participated in sprint planning, code reviews, and iterative feature delivery.
- Worked closely with UX designers, QA, and DevOps teams to deliver production-ready features.
- Contributed to frontend testing using Jest, React Testing Library, and Playwright.
- Supported CI/CD workflows using Docker, GitHub Actions, and Git.
- I maintained good communication with the team, and I was capable of working independently.

Front-end Developer, *Karegivr.health*

03/2024 – 12/2024

Nairobi, Kenya

- Designed, developed, and maintained scalable frontend applications for healthcare operations systems.
- Collaborated with backend developers to integrate APIs and ensure seamless system communication and data flow.
- Supported application reliability, security, and performance optimization across platforms and devices.

- Participated in development best practices, code reviews, and technical documentation for system features and deployment processes.
- Assisted in cloud deployment strategies using Azure and Google Cloud Platform.
- Worked closely with cross-functional teams to implement responsive and user-friendly interfaces aligned with operational requirements.
- Contributed to continuous improvement initiatives by recommending modern frontend technologies and workflow enhancements.

Intern Front-End Developer, Lupleg LLC

01/2024 – 03/2024

Lusaka, Zambia

- Developed clean, scalable, and maintainable React and TypeScript applications following software development best practices.
- Worked closely with backend developers to support frontend-backend integrations and reliable application functionality.
- Participated in Agile delivery processes including sprint planning, stand-ups, retrospectives, and peer code reviews.
- Developed reusable React components to improve scalability and maintainability of applications.
- Maintained technical documentation for features, integrations, and deployment workflows.
- Applied responsive and mobile-first design principles to improve usability and customer experience across devices.

Education

BSc. Computer Science, South Eastern Kenya University

09/2020 – 10/2024

Bachelor of Science in Computer Science with coursework in Software Engineering, System Design, Data Structures, Algorithms, Calculus, Linear Algebra, Machine Learning, and Database Systems.

Kitui, Kenya
