## Professional Summary

Front-End Engineer with two and a half years of experience building scalable, production-grade web applications using React, TypeScript, and Next.js. Strong background in UX collaboration. Excellent reputation for resolving problems and improving customer satisfaction.

## Skills

### Frontend Development

React.js, Next.js (App Router), TypeScript, JavaScript, Node.js, React Native, REST APIs, Zustand, Tanstack Query.

### DevOps & Development Practices

Git, GitHub Actions, CI/CD Pipelines, Docker, Agile, Sprint Planning, Code Reviews, Technical Documentation

### Testing & Quality Assurance

Playwright, Automated Testing, Debugging

### Database and Data Handling

API Integration, Data Validation, Data Exchange, Backend Services

### UX & Design collaboration

Figma, Responsive Design, Mobile-First Development, WCAG Accessibility Standards, Cross-Functional Collaboration

### Mobile Development

React Native, Expo framework.

## Professional Experience

### Frontend Developer, *VisioradAI* [🔗](#)

02/2025 – 04/2026

Ghana, Accra

- Designed, developed, tested, and maintained scalable tele-radiology and reporting applications using React, TypeScript, Next.js, and Node.js within an Agile environment.
- Supported frontend and backend integration through development and consumption of REST APIs and secure authentication workflows (JWT/OAuth).
- Participated in troubleshooting, debugging, and performance optimization to improve system stability and user experience.
- Developed reusable components and contributed to scalable design systems using TailwindCSS and Storybook.
- Collaborated with UX designers, QA teams, and cross-functional stakeholders to translate business requirements into production-ready solutions.
- Implemented CI/CD pipelines using Docker and GitHub Actions to support automated deployment and continuous improvement initiatives.
- Contributed to application testing strategies using Jest, RTL, and Playwright to ensure software quality and reliability.
- Supported iterative feature delivery through Agile sprint planning, retrospectives, and stakeholder feedback cycles.

### Front-end Developer, *Karegiov.health* [🔗](#)

03/2024 – 12/2024

Nairobi, Kenya

- Designed, developed, and maintained scalable frontend applications for healthcare operations systems.
- Collaborated with backend developers to integrate APIs and ensure seamless system communication and data flow.
- Supported application reliability, security, and performance optimization across platforms and devices.

- Participated in development best practices, code reviews, and technical documentation for system features and deployment processes.
- Assisted in cloud deployment strategies using Azure and Google Cloud Platform.
- Worked closely with cross-functional teams to implement responsive and user-friendly interfaces aligned with operational requirements.
- Contributed to continuous improvement initiatives by recommending modern frontend technologies and workflow enhancements.

#### **Intern Front-End Developer, Lupleg LLC**

01/2024 – 03/2024

Lusaka, Zambia

- Developed clean, scalable, and maintainable React and TypeScript applications following software development best practices.
- Worked closely with backend developers to support frontend-backend integrations and reliable application functionality.
- Participated in Agile delivery processes including sprint planning, stand-ups, retrospectives, and peer code reviews.
- Developed reusable React components to improve scalability and maintainability of applications.
- Maintained technical documentation for features, integrations, and deployment workflows.
- Applied responsive and mobile-first design principles to improve usability and customer experience across devices.

## **Education**

---

### **BSc. Computer Science, South Eastern Kenya University**

09/2020 – 10/2024

I studied the fundamentals of computer science and software development across subjects such as System design, Linear algebra, Machine learning, deep learning and Calculus.

Kitui, Kenya
